

ATTENTIVE SAFETY CPR & SAFETY TRAINING

From: Attentive Safety, LLC

Re: **Group First Aid CPR AED Training**

Please consider this proposal to provide **First Aid CPR AED** training to your group. Each person would receive customized training in First Aid based on your industry. Each person will also receive training in both CPR and the use of an Automated External Defibrillator (AED). The curriculum would be compliant with current American Heart Association (AHA) standards. The training lasts approximately 3 hours and 45 minutes. Upon successful completion, each person receives an American Heart Association **First Aid CPR AED** certification card.

You'll never know when you'll need to save a life. Yet new AHA research shows that most employees are not prepared to handle health emergencies in the workplace because they lack training in **CPR and First Aid**.

Attentive Safety LLC shall provide instruction, certification and all equipment necessary to support training at a cost of:

Group First Aid CPR AED Training 5-9 people \$75.00 per person
Group First Aid CPR AED Training 10-19 people \$65.00 per person
Group First Aid CPR AED Training 20+ people \$55.00 per person

The value of CPR

A bystander who administers CPR to a sudden cardiac arrest victim can as much as triple the victim's chances of survival. And since four out of five cardiac arrests happen at home, there's a good chance a rescuer will be helping his or her own loved one.

You may pay for your **Group First Aid CPR AED** Training via our website:
